Hi Pat,

Attached is an updated version with some very minor edits.

A couple questions (and maybe this is for Stephanie). Under "What are the risks at the site" we have the following sentence:

A baseline human health risk assessment was completed in 2014 and identified potential site risks to trespassers and **future residential occupants**.

Can we take out the language that references future residential occupants? I feel like it's a little misleading since this isn't an anticipated future land use at the site.

Also, do we want to include findings of the eco risk assessment for consistency?

Thanks,
Rupika

Hi Rupika,

I don't know if you've seen these edits before. PAO is working to update the SPP pages for all the sites, but we're starting with sites that will have a prap, ROD or other document so the public will be able to access the latest up-to-date information about the site.

I sent these out to Supinder a while ago, I believe. When you get a chance, would you please take a look and make any changes to the edits that are not correct?

A little history – we had a summer intern look at certain SPPs in an attempt to put them all into plain language and in passive voice. The “intern” is now a press person for EPA but wasn't when these were done.

Please don't go crazy making changes – I guarantee you the final SPP will look very different since there are so many people making changes/edits. If you would please go through what's here, make your edits and then send it back to me, I will move it forward to Shereen and Sabina.

The most important thing is to make sure the info is correct. Shereen can upload it to the SPP so you don't have to do that.

Please let me know if you have any questions. Thanks and have a nice weekend.
Pat
